

**Shepton Beauchamp
Parish Council**

Flood Prevention order form

The Parish Council is going to place a bulk order of flood prevention items to obtain the best discount possible. The prices below are worst case - and it is hoped they will be better with the more ordered. Price will be confirmed at the time of order. Of course this is subject to number of everything ordered and if not enough interest then unfortunately we wont be able to place the order.

Traditional Polypropylene Sand Bags

Heavy-duty, UV-protected sandbags are built to endure the toughest conditions, ensuring you're ready when it matters most.

Gel Type Sand Bags

'Floodsax' the convenient modern day equivalent of a Sandbag. Floodsax self inflate and transforms from being as light as a pillowcase to as heavy as a sandbag within minutes! Contains gelling polymer which absorbs water to become taut in just over 3 minutes. Once water absorbed, it stays there and they act like instant sandbags to keep floods at bay.

Air Brick Covers

Airbricks are small bricks with holes near to ground level which supply ventilation to the area under your floor boards. They are essential in the normal construction of the house in order that the house can 'breathe', but during a flood they can let in up to 50,000 litres of water an hour!

You can prevent this with the FLOODTITE Airbrick Cover – a specially made flood barrier engineered to stop the huge influx of water through these often forgotten vents. Floodtite Systems offers flood defence for both single and double airbricks to provide you with the correct solution for your home.
